

Minor Procedures, Biopsy and Wound Care Instructions

- Keep wound dry and outer dressing in place for 48 hours.
- After 48 hours outer dressing may be removed. Leave Steri-Strips in place.
- You may shower after 48 hours unless otherwise instructed. Do not soak incision in a bath for at least 2 weeks.
- Call the phone number below if you experience any fever, bright red bleeding, drainage that contains pus, increasing redness around incision site or severe pain.
- Return as instructed by Dr. Lovelle and/or staff for suture removal.
